

ATTENTION: A registered professional engineer qualified in the field of Fire Protection must be engaged to complete the Fire Protection Sprinkler System Specification Sheet for any fire protection sprinkler system.

S.C. Code Ann. § 40-10-250 requires that a Fire Protection Sprinkler System Specification Sheet ("Sprinkler Spec Sheet") be completed for every fire protection sprinkler system and submitted on a form approved by the State Fire Marshal's Office to the authority having jurisdiction. The approved form can be found at the following link:

<http://scfiremarshal.llronline.com/EngServices/index.asp?file=forms.htm>

S.C. Code Ann. § 40-10-250 requires the form must be (1) completed by a professional engineer licensed in this State bearing his professional seal or signature unless specifically excepted by law; (2) made a part of the documents when applying for building permits or other required permits; and (3) submitted to the authority having jurisdiction, along with the drawings and specifications when they are submitted for review.

Shop drawings must be prepared for every fire sprinkler system and then reviewed in accordance with S.C. Code Ann. § 40-10-260 to determine compliance with the Sprinkler Spec Sheet. Prior to the start of installation of the fire sprinkler system, the drawings must be approved by the Office of the State Fire Marshal or as otherwise specified in S.C. Reg. 71-8300.4.
