

Internships Policy and Procedure #073

In states where practical experience or internship records are not kept nor approved by respective Boards of Pharmacy, affidavits of practical experience will be accepted from colleges of pharmacy. The Pharmacist-in-charge (PIC) must verify the intern hours not reported to a Board of Pharmacy on letterhead. Include with the letter, a copy of the pharmacist's current license and a copy of the current facility permit/license in good standing.

The internship should still fall within the criteria as set by the Board in South Carolina (retail, hospital or other Board approved site) and required of those gaining practical experience within this State. Any deviations or special requests will still be considered by the Board on a case by case basis.

For international students who are unable to obtain an intern certificate, research at the students college will be accepted so long as the Notification of Employment is completed as outlined in S.C. Code Ann §40-43-85(A).
