Since the educational systems of countries vary greatly, comparing the educational level of individuals educated in different countries is complicated and requires specialized knowledge. The procedure used to make such a comparison is completed by Credential Evaluation Services.

Credential Evaluation Services utilize a process of determining the U.S. academic equivalent of studies completed outside the United States. The process provides a detailed analysis of the credentials earned at multiple levels received outside the United States. The evaluation process results in a statement of comparability of an applicant's education when assessed against U.S. standards. This evaluation is sent directly to the State Board of Nursing for South Carolina
